PROFESSIONAL OBJECTIVES

I am a passionate Full-Stack Developer with a keen eye for detail and a strong drive for perfection when working with new technologies and best practices. While my journey began with front-end development, I have expanded my expertise to include back-end technologies and mobile application development. Additionally, I have gained experience integrating Web3 and blockchain solutions into web applications.

I am constantly seeking new opportunities to grow, innovate, and push my limits. My current goal is to work on AI-driven projects and contribute to complex, diverse, and cutting-edge applications. I thrive in dynamic professional environments where I can apply my skills, collaborate with strong teams, and bring forward innovative ideas and practical solutions.

EDUCATION

I have completed a one-year Front-End development course on JavaScript at LinkAcademy, which ran from November 2022, to October 2023.

I attended the Military School of Warrant Officers and Non-Commissioned Officers for Communications, Information Technology and Cyber Defense from August 2019, to August 2020.

EXPERIENCE

I currently work as a Junior Web Developer at Tripel labs ltd. (October 2023 – Present), where I contribute as a Full Stack Developer. In this role, I am responsible for both front-end and back-end development, and I have integrated Web3 technology into trading interfaces. This position allows me to work on cutting-edge solutions while further expanding my full stack development and blockchain integration skills. The tasks are a remote environment.

I worked as a Junior front-end Developer at Zamolxis from February 2023 to September 2023. During this 8-month period, I developed and maintained responsive websites and created mobile interfaces using React Native. I worked with modern front-end technologies and collaborated with the team to deliver high-quality user interfaces. This role allowed me to enhance my technical skills and gain valuable experience in both web and mobile development

I completed an internship at WEBSTER from November 2021 to January 2022, where I gained experience in JavaScript development, responsive design, and API integration, enhancing both my technical skills and ability to work in a team.

I worked at the Ministry of National Defense of Romania from August 2020, to November 2022.

SOFT SKILLS

I am a reliable and punctual professional with strong time management skills, enabling me to prioritize tasks effectively and meet deadlines. I excel at analyzing situations, identifying challenges, and implementing practical solutions, making me a valuable team member. Adaptable to change, I work collaboratively with colleagues to achieve common goals. Additionally, I provide clear and constructive feedback to support team growth and improve overall performance.
